Report Period: Aug 17-30

Summary of Progress in this Period

Met with the professor to run over requirements for the project. Through this meeting we established a basis for the design of our project. This meeting was meant to focus on defining our project so that we could generate ideas in the coming week. Our advisor shared a cybox with us with some readings he would like us to complete before our next meeting.

The team met privately to discuss roles and responsibilities of the project. The roles were decided and together we went over Team Expectations and Setting Roles.
